

With this useful P.A. kit you can easily set up flown audio equipment with standard VMB towerlifts.

**CB-400**

- Excellent solution for P.A. lifting
- Use VMB standard towerlifts
- Easy set up
- Small transport size
- Economic and useful

The Sub bass enclosures are placed at the base conforming a heavy compact block which stabilises the lifting towers. The only thing to do is to turn the winch handle to lift the mid-high cabinets with the truss.
